

SRINIVAS R

AI & Machine Learning Engineer | Full-Stack Developer

+91-88619 79589 srinivassrini14592@gmail.com linkedin.com/in/srinivas-r github.com/SRINIVAS-R-Code

PROFESSIONAL SUMMARY

AI & ML engineering student with internship experience in deep learning, end-to-end ML pipelines, and full-stack AI systems. Skilled in Python, TensorFlow/Keras, Scikit-learn, RAG, and LLMs.

WORK EXPERIENCE

AI Training Intern — Deep Learning & Neural Networks | *Contriver, Bangalore* | Feb 2026 – May 2026

- Fine-tuned CNN & RNN architectures using TensorFlow/Keras; built end-to-end ML pipelines covering preprocessing, training, hyperparameter tuning, and deployment readiness.

Software Engineering Intern — Web Mapping & Corridor Optimization | *SORAENERGYB.V., Netherlands* | Mar 2025 – Jul 2025

- Built **Geo ChargeOpt** — analysed 30+ EV stations, identified **50+ optimal DC charger sites** via GIS/KML density mapping; React.js + Leaflet.js + Firebase frontend cut latency **40%** and analysis time by **30%**.

PROJECTS

Enterprise AI Assistant | *Python, LangChain, RAG, MySQL, LLM, HuggingFace*

- Built an enterprise AI assistant using RAG over MySQL; integrated an LLM with a vector retrieval pipeline to enable natural language querying of structured domain data.

SmartPark — Parking Availability Predictor | *Python, Scikit-learn, Django, React, Machine Learning*

- Built a parking prediction system using Random Forest on **600K+ records**; deployed via Django REST API with a React + Leaflet.js map for real-time forecasting.

YOLOv8 Object Detection System | *Python, YOLOv8, OpenCV, PyTorch, Roboflow*

- Trained and fine-tuned a YOLOv8 model for real-time object detection; built an annotation pipeline using Roboflow, optimised the model for inference, and evaluated performance across detection and classification tasks.

AI-Based Inventory Management System | *Python, Scikit-learn, Django, React, PostgreSQL*

- ML-driven inventory optimization reducing overstock by **20%** and review time by **35%**; RBAC, automated reorder alerts, PostgreSQL supporting **500+ SKUs**.

TECHNICAL SKILLS

Programming	Python
Machine Learning	Scikit-learn, TensorFlow, Keras, CNN, RNN, YOLOv8, Regression, NLP
Deep Learning	Neural Networks, Transfer Learning, Hyperparameter Tuning
Generative AI / LLM	Large Language Models (LLMs), Prompt Engineering, GenAI Applications
Web Development	React.js, Django, Leaflet.js
Data Visualization	Power BI, Tableau, Matplotlib, Seaborn
Tools & DevOps	Git, GitHub, VS Code

EDUCATION

B.E. — Computer Science & Engineering (AI & ML) Sambhram Institute of Technology, Bangalore (VTU)	2022 – 2026 CGPA: 7.98/10
Pre-University Certificate (PUC) — PCMB Nisarga PU College, Bangalore	2020 – 2022 61%
Secondary School Leaving Certificate (SSLC) Gyanodaya International School	2020 80%

CERTIFICATIONS & ACHIEVEMENTS

- SORAENERGYB.V., Netherlands** — Letter of Reference for EV Corridor Optimization Internship
- The Edge International Internship** — IIMSTC, Bangalore
- UiPath** — Introduction to Automation (RPA)
- Office Master** — Power BI Workshop
- Code Tech** — Python Hackathon Participant
